

Christmas Addition

$$\text{Gift} + \text{Gingerbread} + \text{Santa} + 22 = 36 + \text{Tree} + \text{Tree}$$

$$\text{Santa} + \text{Gift} + \text{Gift} + 8 = 6 + \text{Gingerbread} + \text{Tree}$$

$$\text{Tree} + \text{Gift} + \text{Gingerbread} = 2 + \text{Santa} + \text{Santa}$$

$$\text{Tree} + \text{Tree} + \text{Gingerbread} + \text{Gift} = 22 + \text{Santa}$$

$$\text{Santa} + \text{Santa} + \text{Gingerbread} + \text{Gift} = 10 + \text{Tree} + \text{Tree} + \text{Tree} + \text{Tree}$$

Each symbol in the above equations stands for a different number; however, each stands for the same number every time it appears. Can you figure out what number each figure represents?

$$\text{Santa} = \quad \text{Gingerbread} = \quad \text{Gift} = \quad \text{Tree} =$$
